

## Series 07 – GTO (Guaranteed To Outperform) Hybrid Bond Tooling

### Technical Data:

#### Packaging

Varies by diameter

#### Coverage

Coverage can vary from surface to surface depending on roughness, porosity and density of the medium being applied. Application technique can also vary the coverage. On flat, dense surfaces, the coverage should generally range from 8000 to 12000 square feet per set. Wet grinding will usually extend the life of the tooling.

#### Specifications

Bond Color: Brown

Grit/Velcro Color:  
30 Grit – Light Blue  
50 Grit – Gray  
100 Grit – Yellow  
200 Grit – Orange  
400 Grit – Red  
800 Grit – Green

Diameters: 3", 4", 5", 7"  
Thickness: 3 MM  
Maximum Speed: 6000  
RPM

Use **WET** or **DRY**

### Description

**The 07 Series** diamond tooling is a matrix of high quality abrasive diamonds bonded with a proprietary mix of various metals and resins designed for long life, exceptional durability, high flexibility and incomparable scratch removal. The GTO Hybrids are designed for **wet** or **dry** applications and the face design provides excellent channeling for dust or slurry. The consistency of performance is outstanding. The manufacturing process ensures even distribution of abrasives through the resin adding to the longevity and performance of the tooling. The 07 Series of transitional tooling is Guaranteed To Outperform any transitional diamond tooling on the market.

### Uses

**The 07 Series** is an excellent transitional diamond generally used between aggressive metal tooling and higher grit resin bond tools. These Hybrid tools are unsurpassed in scratch removal usually caused by aggressive metals commonly used in the first few steps of the grinding process. The GTO Hybrid is also an excellent choice where "Salt and Pepper" aggregate to no aggregate exposure is needed. The flexibility of the pad follows the contours of the surface making it an ideal choice on wavy or undulated surfaces.

### Application

**The 07 Series GTO Hybrid** is an ideal tool on concrete and terrazzo surfaces or natural stone surfaces. The variety of sizes available provides the ideal tool for grinding, refining and polishing floors and edges, countertops and architectural accessories. Please refer to the "Ra Chart for Traditional System" for recommended RPM's and Maximum Refinement Ra's.

07 Series – GTO Hybrid Bond
